FEYSAL JEYLAN

SKILLS & CAREER GOALS

I'm a tech-minded business student with a builder's instinct and a founder's ambition. With skills in front-end development, digital design, and systems thinking, I create projects that blend clean code with real-world purpose. I'm not just learning to code—I'm preparing to launch. My goal is to build startups that empower people and simplify systems, especially in education and digital finance. I'm seeking an internship that challenges me to reimagine how things work—and build what's next.

WORK EXPERIENCE

Volunteer Educator
Robe Education Office & Mayor's Office – Robe Town, Summer 2024

- Taught and mentored students during summer break; recognized with certificates by local education office and mayor.

- Gained strong communication, leadership, and adaptability while inspiring and learning from students.

Web Development Projects (Self-Initiated)

- Built multiple front-end projects: To-Do List, E-Commerce site, JavaScript mini-games, and personal portfolio website.

- Boosted efficiency with 50+ WPM typing using full ten-finger technique.
